Regular meditation can cultivate emotional regulation and improve your overall mental well-being. Even 5-10 minutes a day can make a noticeable difference. There are many guided meditation apps available to help you begin.

- **Sufficient Sleep:** Aim for 7-9 hours of quality sleep each night. Establish a regular sleep schedule and create a relaxing bedtime routine.
- **Social Connection:** Maintain strong social connections with loved ones. Social support is essential for mental well-being.

- **Jumping to conclusions:** Making assumptions without sufficient evidence. Example: Assuming someone dislikes you because they didn't smile.
- **Catastrophizing:** Expecting the worst possible outcome. Example: "If I apply for this job and don't get it, my life will be ruined."
