Q3: How many past papers should I solve?

A3: There's no magic number. Aim for solving at least a few papers per subject, focusing more on papers from recent years. The more you practice, the better you will become at understanding the pattern and managing your time effectively.

Q4: What if I don't understand a question or solution?

A4: Don't hesitate to seek help! Ask your professors, teaching assistants, or fellow students for clarification. Understanding the underlying concepts is more crucial than just memorizing answers.
