Scene Modes

The camera provides several pre-programmed scene modes, such as "Landscape," "Portrait," "Night Portrait," and "Sports." Understanding these scene modes allows you to tailor your approach for different subjects and lighting conditions.

Manual Mode (If Available - Check your specific model variation)

While the S4200 primarily focuses on automatic functionality, some variations might offer a degree of manual control. ISO Sensitivity

ISO sensitivity determines the camera's sensitivity to light. Lower ISO values (e.g., ISO 100) are best for bright conditions, producing sharp images with minimal noise. Higher ISO values (e.g., ISO 1600) are necessary in low-light situations, but they may introduce more image noise (grain). Understanding the trade-off between sharpness and noise is essential for capturing high-quality images in various lighting conditions.
