Materials: Approximately 30-40 loop bands (depending on desired bracelet length and thickness), and scissors.

Instructions:

1. **Prepare the Starting Knot:** Take two loop bands and create a simple overhand knot, leaving a small loop at the end. This will form the base of your bracelet.
2. **Adding More Bands:** Take a new loop band and loop it through the existing knot. Next, carefully loop the ends of this new band over each end of the original knot. Pull gently to tighten and secure the new band.
3. **Repeat the Process:** Continue adding loop bands one at a time, repeating step 2. Maintain a consistent tension to ensure even spacing and a uniform look.
4. **Adjusting Length:** As you add more bands, check the bracelet's length against your wrist. Once it reaches the desired size, prepare to finish the bracelet.
5. **Finishing the Bracelet:** Once you've reached your desired length, carefully weave the end of the last loop band through the very first knot, securing the end. Trim any excess length carefully with scissors.
