A2: This depends on usage frequency and the type of food being fried. The oil should be replaced when it becomes dark, cloudy, or develops a burnt smell. Your Oster deep fryer manual may provide guidance, but generally, changing the oil after 3-4 uses or when it visibly degrades is advisable.

Q3: My Oster deep fryer isn't heating up. What should I do?

A3: First, check if the fryer is properly plugged in and that the power outlet is working. Then, refer to the troubleshooting section in your Oster deep fryer manual. A4: Allow the oil to cool completely.
