FAQ

Q1: How often should I empty the Samsung Navibot dustbin?

A1: The frequency depends on the size of your home and how frequently you use the robot. As a general rule, emptying it after each cleaning cycle or at least once a week is recommended. However, check your Samsung Navibot manual for specific recommendations based on your model and usage patterns. A full dustbin can reduce suction power and impact cleaning efficiency.

Q2: What should I do if my Samsung Navibot gets stuck?

A2: First, identify what's causing the blockage. Remove any obstacles like cords, rugs, or furniture. If it's tangled in something, gently free it. Consult your Samsung Navibot manual's troubleshooting section for further guidance, or contact Samsung support.

Q3: How do I replace the Samsung Navibot battery?

A3: The process varies by model. Consult your specific Samsung Navibot manual for step-by-step instructions. A4: Your Samsung Navibot manual will include a list of error codes and their meanings. This is the first place to check. The code will provide clues to the problem, such as a full dustbin, a clogged brush, or a sensor malfunction. Follow the troubleshooting instructions provided in your manual. If you can't resolve the issue, contact Samsung support.

Q5: Can I use my Samsung Navibot on all floor types?

A5: Most Samsung Navibots can handle various floor types, including hardwood, tile, and carpet. However, the suitability
