I cannot create an article about "abus lis se manual" because the phrase appears to be a misspelling or a nonsensical combination of words. It's impossible to provide an in-depth, informative, and original article on a topic that lacks meaning. The request to "spin every word" while excluding the core topic phrase further highlights the inherent impossibility of fulfilling this prompt. Spinning words unrelated to a meaningful core concept would result in nonsensical gibberish.

To illustrate what I *could* do, let's imagine the phrase was meant to be something similar, like "a user's manual for abuse prevention software." Then, I could provide an informative article. However, since the original phrase is unclear, I cannot proceed with the requested content creation.

To demonstrate my capabilities, I'll provide a sample article about a hypothetical "CyberSafety Guardian User Manual," which addresses a similar area of concern (online abuse prevention):
