You might encounter questions involving sequences, series, and conditional statements. Practice with logical puzzles and critical thinking exercises will help you develop this skill.
- **Numerical Reasoning:** While less prevalent than the other sections, some LEABs include questions assessing numerical skills, including basic arithmetic, data interpretation, and number series. Review basic math principles and practice interpreting data presented in graphs and charts.
- **Situational Judgment Tests (SJT):** Many LEABs incorporate situational judgment tests. These present realistic scenarios common in law enforcement and assess your judgment in responding appropriately. Thoroughly review different scenarios and their possible resolutions.
